5:35-7:35	Prostate Cancer	Dr. Khalid Al Othman
6:25-6:35	Maghrib Break	

- The course would include all levels of urology residents.
- The course will be exam oriented. The reference would be Campbell and Campbell Review
- A virtual platform will carry it out.
- It would be a good chance for PGY 5 going to their final exam this year.
- Besides, it would also be a good revision for the other level of PGY going to the end of year promotion exam within 1 week after the exam.
- In addition, it could serve as an overview for PGY1 residents who completed their GS training and joining the urology department.
- All lectures would be recorded, and the lectures would be shared with the participants (immediately) for unlimited viewing (but no downloading) with a unique password and would be open for viewing until after the final oral exam.

- There would be no OSCE exam in this course. As the Oral Exam is far away from the current course. However, an OSCE exam could be prepared separately for the PGY5s just before the oral exam.
- The course was extended for seven days upon the request of the participants from last year and who participated in this year's survey.
- Points from the survey last year and this year were seriously considered regarding the topics, timing, and speakers. Nonetheless, we could not respond to all requests for various reasons. One, for example, is the apology from a few of the requested speakers. Another reason is the involvement of some of the requested speakers in the exam committee.
- The course this year included 14 speakers all with subspecialties and experience in their assigned topics.
- The fees would be 1000 SR for SUA members and 1150 for non-SUA members.
- The deadline for registration is 28 August 2021.

- Please note that on the 4<sup>th</sup> day (1-9-2021) the lectures will start at 3:00 pm.
